"... WE ALREADY HAVE ZOOM, SKYPE, GOTOMEETING."

Forum isn't a video conferencing solution that connects people across the country. It's for making meetings easier when presenting in person—anywhere you want.

"... BUT WE ALREADY USE POWERPOINT."

Forum isn't used for crafting presentations, but for broadcasting presentations and connecting to in-person audiences. You can still create with PowerPoint, Keynote or any other presentation-building software.

FORUM SUBSCRIPTION LEVELS

Forum is available now for download. Each subscription level increases the number of devices you can connect.

Forum SOHO
(Small Office / Home Office)

A wide range of organizational-level purchase options are available for enterprises and specific industries. Please contact sales@fasetto.com for more information.

Transform your meetings today, Forum is available now.

Forum ™

Connect with your audience.™

Present in-person directly to anyone's phone, tablet or laptop—the devices your audience already has—to share presentations and receive participant input anywhere without the internet, dongles or cables. Forum allows you to turn any space into a meeting space, whether it's an open office, huddle space, cafe—anywhere.

FORUM IS FOR WHEREVER BUSINESS HAPPENS.

Forum is presentation software that makes presenting possible wherever business takes you. Connect and present your ideas, pitches, or information directly to anyone's laptop, tablet or smartphone.

## FORUM TURNS YOUR LAPTOP INTO A CONNECTED, MEETING HUB.

Forum can be used anywhere. It turns your Laptop into a multi-person presentation tool that connects to any Wi-Fi-enabled device. Using an optional router can expand the range and number of audience members.

EVERY SEAT BECOMES A FRONT ROW.

There isn't a bad seat in the house when every device displays the presentation. Every phone, tablet or laptop becomes an additional engagement tool for more productive meetings with Forum.

PRESENTATION PROBLEMS

Every presenter knows that panicked feeling when valuable meeting time is being wasted because of all the issues that can (and usually do) go wrong while setting up for a meeting.

- Losing your meeting room because of a crowded office
- Gathering around small laptop screens to see a presentation
- Finding the right adapters to connect meeting displays

- Trying to access secure corporate networks
- Downloading extra software for audiences
- Keeping your meeting participants engaged

ENGAGE YOUR AUDIENCE.

Forum does more than just show presentations. Powerful audience-engagement features allow you to interact with audiences in new ways and take advantage of opportunities when they happen. Discreet Q&A, audience polls, screen sharing, file sharing and contact exchange create a powerful, connected meeting experience that aids in analytics and lead generation.

CONNECT BEYOND THE OFFICE.

Forum works great anywhere people gather to meet and share ideas through a presentation. Common use-cases that happen every day—in every corner of the world—need a tool like Forum, such as:

- Internal company meetings
- Sales calls in the field
- Training sessions
- Confidential meetings

- Classrooms
- Press/media events
- Town halls and rallies
- Sports-teams in transit

- Museum and historical sites
- Manufacturing floors
- Healthcare-related meetings
- Keynotes and conferences

MAKE YOUR OWN NETWORK. NO INTERNET REQUIRED.

Make your own network—no internet required. Whether it's a personal network, an enterprise network (LAN) or a portable network (travel router), Forum allows you to present whenever and wherever.

Forum is ready to transform how people meet.

Share ideas and engage audiences in all new ways.
