Fasetto Announces New Headquarters in Arizona

The technology solutions company moved to new office in Scottsdale as part of expansion plans to grow the number of product development personnel

Scottsdale, AZ—March 3, 2020— Fasetto, a solution-driven company focused in creating the secure sharing of information and visual media, has announced the move of its headquarters to Arizona. The move to the new office in Scottsdale is part of the company’s expansion plans to grow the number of product development personnel. Phoenix is the fifth largest city in the U.S. and has attracted some of the biggest names in tech including Clearlink, Go Daddy, Infusionsoft and LifeLock.

“The Phoenix area, due to the rise of the tech sector here, means that there are deeper software developer resources available, said Fasetto CEO Coy Christmas. “Plus, we have top universities that have amped up their curriculum to meet the needs of the local economy.”

Phoenix also gives Fasetto greater access to leading companies such as American Express and Charles Schwab to develop strategic partnerships – all part of the company’s plan for rapid expansion. Fasetto currently has offices in Superior, WI, and Ladera Ranch, CA. These offices will continue operating with the addition of the office in Arizona. The Scottsdale location is currently hiring, and resumes can be sent to rochelle.ballou@fasetto.com. Or Fasetto employees can be seen at Scottsdale, AZ, job fairs looking for experienced Full Stack Developers with a bachelor’s degree in computer science, software engineering or a related degree.

###

Fasetto creates technology solutions for an increasingly connected world. Our goal is to improve communication, accelerate the movement of media and break through the limitations of the products we use every day. As a developer of hardware and software products, Fasetto makes information sharing intuitive and spontaneous with the Gravity platform that enables seamless connectivity between people, their content and the devices they use regardless of platform, device or network. Forum is a powerful in-person presentation application that allows you to present directly to anyone’s phone, tablet or laptop. Visit Fasetto at www.fasetto.com for more information.
